High performance. Delivered.

TUESDAY NOVEMBER 24 12.15 - 15.30

ABG Sundal Collier, Forbindelsesvej 12, 2100 Copenhagen

**T**he new digital platform of cloud, mobility, big data and social media changes the opportunities for organizations to use IT to drive growth and perhaps even disrupt their markets. But it also changes the game for IT and services vendors. New delivery models and focus on digital transformation, challenges traditional business models and revenue streams. It also changes the competitive landscape – and there is no escape.

ABG Sundal Collier is pleased to invite you to our IT seminar with leading IT Services and software companies. Opening the seminar, Mette Ahorlu, research director IDC European services, will discuss how vendors need to re-invent themselves in the world of constant rapid change. The presentation will draw on IDC's extensive research of the IT markets globally, regionally and locally and discuss examples of both IT vendor and client transformation.

Clients free of charge | Other participants: 7.500 kr.
